

ERROR 404

1.

</ Code Not Found. Find it. Fix it. Finish it. />

Event Type:

Individual Coding Contest (C++ Only)

Format & Duration:

1 Person per Entry (No Teams) | 2 Hours (All 3 Rounds)

Description:

ERROR 404 is a fast-paced C++ debugging and code-completion competition. Code snippets are displayed on a desktop screen, testing participants' speed, logic, and precision under pressure. Participants must spot bugs, rectify logical flaws, and complete missing code segments faster and more accurately than fellow competitors. Only top performers advance through the elimination brackets.

Event Overview & Elimination Structure:

- Round 1 — Bug Hunt (Easy | 1 Min): Find errors in a displayed C++ code. Top 50% advance based on the number of errors identified.
- Round 2 — Fix & Run (Medium | 2 Min): Find errors, rectify them, and display the correct program output. Top 50% of remaining participants advance.
- Round 3 — Complete the Code (Hard | 3 Min): Study an incomplete pattern problem, finish missing code segments, and show output. Top 3 participants win podium awards.

Example Progression: Out of 40 initial participants, ~20 qualify for Round 2, ~10 advance to Round 3, and the top 3 claim final podium positions.

Detailed Round Specifications:

- Round 1 (Bug Hunt - Easy):
 - A C++ program containing multiple bugs is shown on the desktop screen.
 - Time limit: 1 minute. Answers submitted via venue Google Form.
 - Participants finding the maximum number of correct errors advance (top ~50%).
 - Tie-breaker: If cut-off scores tie, a harder code challenge is shown for 30 seconds.
- Round 2 (Fix & Run - Medium):
 - A new erroneous C++ program is displayed on the screen.
 - Time limit: 2 minutes. Participants must detect errors, fix them, and show correct output.
 - Faster verified correct answers rank higher. Top ~50% advance to finals.
- Round 3 (Complete the Code - Hard):
 - An incomplete C++ pattern problem is displayed on the screen.
 - Study the logic; the code structure serves as the hint. Complete missing parts and output.
 - Time limit: 3 minutes. The top 3 participants are declared overall winners.

Rules, Regulations & Tips:

- Individual participation only; strictly one participant per entry.
- Language Constraint: Only C++ is permitted in every competition round.
- Zero Device & Web Access: Mobile phones are strictly prohibited. No internet, AI tools, or external help of any kind.
- Independent Conduct: Do not talk to, collaborate with, or copy from other participants.
- Strict Time Limits: Once time expires, submissions are closed immediately.
- Confidentiality: Code snippets and questions are confidential; recording or sharing is barred.
- Integrity & Decisions: Any malpractice leads to immediate disqualification. The decision of coordinators and judges is final and binding.

Strategy Tips:

- Scan for classic C++ mistakes first: missing semicolons, wrong headers, undeclared variables, loop bounds, and mismatched brackets.
- For Round 3, trace the pattern logic mentally before writing the missing lines. A correct answer beats a fast wrong one.

Bring your logic. Leave your bugs.
